github.com/dogukanaktas | daktas.dev | Istanbul, Turkey

Frontend Developer with 5+ years of experience building scalable web applications in SaaS, ERP, and Fintech domains. Skilled in React.js, Next.js, TypeScript, and modern frontend technologies. Experienced in working with international teams and global enterprise clients. Currently expanding into full-stack and AI engineering.

Experience

Frontend Developer, AKINON

04/2022 - 10/2024

- Consistently achieved high efficiency, maintaining a minimum 104% KPI performance, which measured a combination of low bug density, successful sprint commitment completion, and high order fulfillment reliability.
- Successfully scaled unit test coverage from 5% to 80%, reducing production defects by ~25%.
- Standardized coding and code review processes while boosting documentation coverage from 20% to 90%, resulting in significant improvements to project maintainability and onboarding efficiency.
- Optimized performance by refactoring over 200 legacy components and over 60 functions and updating over 25 project dependencies.
- Developed and deployed key features and critical bug fixes for the Akinon Instore App, enhancing the in-store experience for clients including Samsung, GAP, Lacoste, Marks & Spencer, Under Armour, and L'Occitane.

Tech: HTML5, CSS3 (Ant Design, LESS), JavaScript, React.js, Redux, Context API, Testing Library, GIT, i18n

Frontend Developer, GAIA

04/2021 - 04/2022

- Launched new Money Transfer modules for Digital Commerce Bank's (Canada) user interface and significantly improved overall code maintainability by refactoring over 400 legacy components.
- Managed cross-cultural communication and coordination across a 15-person team, including local developers and remote teams in Canada and Kyrgyzstan, to ensure project alignment.
- Initiated the development of the brand new Digital Commerce Bank ERP project, utilizing React.js to build a high-performance, single-page application (SPA).

Tech: HTML5, CSS3 (Material UI, SASS/SCSS), JavaScript, TypeScript, React.js, Redux, Context API, GIT

Frontend Developer, POTANET

11/2020 - 04/2021

- Developed the Potanet ERP dashboard from scratch as the sole frontend engineer, constructing 100+ reusable React components and implementing a responsive design that improved cross-device usability.
- Led the frontend development of the Potanet e-Invoice project, delivering the MVP 2 weeks ahead of schedule.
- Reduced average issue resolution time by ~30% by acting as the main technical contact for client requirements.

Tech: HTML5, CSS3 (Material UI, SASS/SCSS), JavaScript, TypeScript, React.js, Redux, Context API, GIT

Skills

- Languages & Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Vue.js, Redux, Zustand, Context API, React Query, HTML5, CSS3, UI/UX
- Styling & UI: Tailwind, Ant Design, Material UI, Bootstrap, SASS/SCSS, LESS, Shadcn
- Backend & Testing : Node.js, Express.js, MongoDB, React Testing Library, Cypress
- Tools & Methodologies: Git, Webpack, Sentry, JIRA, i18n, Agile (Scrum, Kanban)

Education

Beykent University

2019

MBA

Beykent University

2017

B.S. in Electronics and Communication Engineering
